## Education

---

08/2019 – present **Bachelor of Engineering , Computer Science and Engineering**  
Bangalore, India *Ramaiah Institute of Technology*  
CGPA : 9.67

## Projects

---

- 04/2022 – 07/2022 **Genetic Algorithm based Crude Oil Price forecasting** ☑  
*Model and web application for forecasting crude oil prices.*
- Crude Oil prices from 1987-2022 were used to train traditional time series models and a genetic algorithm model
  - The results obtained from both the models were compared.
  - A web application for forecasting new prices was also created.
- 09/2021 – 11/2021 **Placement Portal Web Application** ☑  
*DBMS project - 5th Sem*
- A web application which allows students and companies to go through the placement process seamlessly.
  - Students can view job offers and apply for them, while companies can evaluate and hire students.
  - Built using NodeJS, MySQL, EJS.
- 10/2021 – 11/2021 **Automatic Attendance System using Face Recognition** ☑  
*Python application*
- Image processing project.
  - An application to mark the attendance of the class by taking a picture of the class.
  - Recognises the faces in the photo and marks the attendance in a csv file accordingly.
  - Facial features are precomputed and stored.
- 06/2022 – 07/2022 **Heart Risk Classification** ☑  
*Machine Learning web application*
- Web application to predict heart risk.
  - Uses Logistic Regression and Random Forest Classification.
- 11/2021 – 11/2021 **Personal Portfolio** ☑  
*My personal website built using ReactJS*  
A place where I describe my skills, projects and myself. Built using ReactJS and ThreeJS.

## Skills

---

Programming Languages: Python, Javascript.

Databases: MongoDB Atlas, MySQL

Web Application Development: ReactJS, JavaScript,

NodeJS, Redux, Flask

## Certificates

---

- The complete web development bootcamp - Udemy ☑

## Coding Profile

---

**Hackerrank** ☑

5 stars
